Understanding Project Goals and Expectations:
  -
  - What specific outcomes do you hope to achieve with this project?
      - Can you describe the main goals of a centralized platform in more detail?
  - What success metrics or key performance indicators would you like us to consider?
      - What does a successful outcome for this project look like from your perspective?

Target Users and Stakeholders:
  - What are the primary stakeholders other than the service providers for this project?
  - Can you provide more details on the primary service providers we should engage with?
      - Do you have any existing data on demographics, roles, or challenges with these providers?
  - Are there any particular organizations or individuals you recommend we contact for user research?
  - How do service providers find and share information with you all?

Current Challenges:
  - What are your biggest challenges with connecting community members with resources?
Technical and Functional
  - Policy or regulatory constraints regarding how resources and information are shared and managed?
  - What are your biggest pain points with your current service providers?
  - What concerns or risks do you all have regarding this project?

Administrative:
  - Desired reporting frequency:
      - Regarding future meetings (project check-ins) what days work best for you? And can we schedule this on a weekly/bi-weekly basis? Or would you prefer us to check in on your availability on a weekly/bi-weekly basis?
  - Project timeline expectations
      - When do you want certain deliverables completed or somewhat completed?
  - Deliverables
      - What is the desired process for the approval of final versions of the deliverables?

Is there anything you would like to know about us as a team or any additional information you need from us to move forward?
